Study Code

Background

- Gender
- Age
- Comorbid conditions
- Previous surgery

Indication

- Date of last successful HD
- Venous pressure
- Blood flow during HD
- Degree and length of stenosis on USG

Procedure

- Date
- Duration
- Angiogram findings
- Blood loss
- Type of balloon
- Balloon diameter
- Balloon length
- Device success
- Stenting required

Follow-up

- Sonographic assessment 1 week
- Sonographic assessment 3 months
- Sonographic assessment 6 months
- Sonographic assessment 9 months
- Sonographic assessment 12 months
- Successful HD
- Date of successful HD
- Clinical success
- Venous pressure during HD
- Blood flow during HD
- Complications
- Reintervention
- Date of reintervention
- Type of reintervention
