

Adnan asked mom and dad to go together to the dentist in order to get white strong teeth

Dental Office

2

A sign with a red outline of a house and the text 'Dental Office' with a yellow arrow pointing right. Below the sign are silhouettes of a man, a woman, and a child walking towards the office.

1

Adnan noticed that the teeth of his friend Samir had a yellowish brown terrible appearance and had toothaches

My teeth are "aching" when I do have candy

A close-up of a boy's face with large eyes and a pained expression. He has a speech bubble that says 'My teeth are "aching" when I do have candy'. The background is pink.

4

Well, I will help you but let me check... how many times do you brush your teeth?

I brush my teeth once a day.

Hmmm, Adnan! To keep good care of your teeth, brush twice a day - morning and night!!!

The dentist is leaning over a dental chair, talking to the boy who is sitting in it. The dentist has a speech bubble asking about brushing frequency, and the boy replies. The dentist then gives advice on brushing twice a day.

3

Hello Adnan. How are you doing? Why are you here today?

I am here to know how to take good care of my teeth.

The dentist is standing and talking to the boy who is standing next to a dental chair. The dentist asks how the boy is and why he is there. The boy explains he wants to learn how to take good care of his teeth.

To keep your teeth happy and healthy, let me see if you use another method to reach the spaces between your teeth.

Well, actually, many people have problems with toothpicks as it is harmful to the gums. We do not recommend it in the office. Do not you think that there is another way for reaching the spaces between teeth?

Flossing can be very helpful as you can scrape 3 times on each side of the tooth to keep it clean

Yes, I use toothpicks

5

The dentist is showing the boy a close-up of a tooth being cleaned with floss. A speech bubble explains that flossing is helpful. Another speech bubble explains that toothpicks are harmful. A red 'X' is placed over a toothpick, and a green checkmark is placed over the flossing action. The boy replies that he uses toothpicks.
